PROFESSIONAL SUMMARY

Web Developer with professional experience building responsive business websites and CMS-driven web solutions for enterprise clients. Currently working at RR Donnelley, contributing to production web platforms through frontend development, content management systems, and responsive implementation across multiple devices.

Combines a formal background in UI/UX Design with hands-on development experience, allowing seamless translation of design concepts into scalable, maintainable, and user-focused web experiences. Actively develops open-source software, self-hosted applications, and developer tools, with interests spanning frontend engineering, backend systems, and product development.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, SCSS, JavaScript (ES6+), React, jQuery, Responsive Design

Backend: PHP, MySQL, REST APIs

Mobile: React Native

CMS: Wordpress

Design: UI/UX Design, Figma, Adobe Photoshop, Adobe Illustrator

Tools & Platforms: Linux (Debian/Ubuntu), Git, GitHub

PROFESSIONAL EXPERIENCE

Web Developer

RR Donnelley | Chennai, India

March 2025 – Present

- Develop and maintain business-critical websites for enterprise clients using HTML, CSS, JavaScript, PHP, and WordPress.
- Transform design requirements into responsive, cross-device web experiences while maintaining consistency across desktop, tablet, and mobile platforms.
- Customize and manage CMS-driven websites, enabling content updates, feature enhancements, and long-term maintainability.
- Collaborate with designers, developers, QA teams, and project stakeholders throughout the development lifecycle, from implementation to deployment.
- Troubleshoot production issues, optimize website behaviour, and contribute to ongoing platform improvements.
- Support delivery of client-facing business websites by balancing usability, performance, and maintainability requirements.
- Received the Bright Spark Award in recognition of technical contributions and performance.

Tech Stack: HTML, CSS, SCSS, JavaScript, jQuery, PHP, MySQL, WordPress, CMS Development

SELECTED PROJECTS

StackMailr | [Github](#)

Self-hosted email campaign platform designed for local deployment.

- Built a complete web-based workflow for managing contacts and creating HTML email campaigns.
- Focused on usability and portability, allowing deployment without reliance on external services.

Tech Stack: PHP, JSON, JavaScript, HTML, CSS, SCSS

Pamager | [Github](#)

Self-hosted password management application optimized for mobile devices.

- Designed a lightweight interface prioritizing accessibility and quick access on smaller screens.
- Developed secure credential management workflows using a database-driven architecture.
- Focused on simplicity, portability, and self-hosted deployment.

Tech Stack: PHP, MySQL, JavaScript, HTML, CSS, SCSS

EasySCSS | [Github](#)

Open-source SCSS utility library.

- Created reusable styling utilities to reduce repetitive CSS patterns across projects.
- Organized styles into modular components to improve maintainability and scalability.
- Published as an open-source project for community use and experimentation.

Tech Stack: SCSS

Open-Source Development

- Developed plugins for PocketMine-MP servers, extending functionality through custom PHP-based systems.
- Built and maintained community-focused websites, including the BushSMP project.
- Created portfolio templates and developer resources published on GitHub.
- Experimented with API integrations and lightweight web applications through projects such as InsultSite.

EDUCATION

Bachelor of Science (B.Sc.)

UI/UX Design and Development

ICAT Design and Media College

2022 – 2025

ACHIEVEMENTS

- Bright Spark Award Recipient, RR Donnelley.
- Professional experience contributing to enterprise web projects.
- Active open-source contributor with publicly available projects and tools.
- Designed and developed self-hosted applications spanning productivity, communication, and developer tooling.
